

## Testimonial Carmine Di Paolo Sussex Brickworking

05/03/15

Five year ago I had my kitchen extended internally using up some of the wasted space in the garage. Ever since that time when the weather turns really cold and falls below freezing the new extension felt very cold. I discovered that part of the problem was due to the poor insulation in roof space above what was the old utility room. This was separated from the main roof space by a fire break wall. I asked Carmine if could insulate this space correctly.

Carmine took part of the wall down to access the space insulated it and rebuilt the wall. He was quick any very efficient, leaving the house in the state that he found it and ensuring that all the waste materials were correctly disposed of. We now have a much warmer kitchen and I am saving on heating bills.

If you want a cost effective builder who will turn up when he says work cleanly and quickly at a sensible price, I would ask you to look no further than Carmine.

Thank you Carmine I will be recommending your services to family, friends and clients.
